

# Upcoming Events

## ▶ What is Trident Manor?

Trident Manor is an independent risk, security and crisis management consultancy to national and international clients across a wide range of industries and sectors. Our skills and experience enable proportionate protective solutions to be introduced that reduce individual and organisational risks to acceptable and manageable levels.

## ▶ When & What Are The Events?

29th July

**Introduction to Cultural and Heritage Protection Workshop**

9th September

**Introduction to Security Risk Management for Cultural Properties**

14th October

**Protecting Cultural and Heritage Venues**

## ▶ Why Should I Attend?

### 1 | Learning

**Andy Davis** has been directly involved in security and risk management roles since 1987. He holds a Master's of Science (MSc.) degree from the University of Leicester in Security and Risk Management, is a Chartered Security Professional (CSyP) and a Fellow of the Security Institute (FSyI) as well as being board certified by ASIS International as a Certified Protection Professional.

In our last workshop on protecting heritage and cultural venues, our participants completed feedback forms at the end of the workshop. The results showed 100% of participant agreed the event to be useful & relevant, along with over 90% of our aims being given the highest possible rating.

### 2 | Networking

Have a day learning new skills whilst being surrounded by others in the same field as yourself. With a mixture of theory, practice and group discussions, it would be harder not to make new contacts at one of our events!

## ▶ Quotes from Previous attendees

'Practical application of theory. Exactly what to look out for + how to respond.'

'The practical examples provided during each session helped understand the concepts better. Love the role play at the end!'

' Very interesting & enjoyable delivery. defiantly made me think about processes at our museum. Thank You.'

'I found the Analysis of the attack methodologies and mindset of criminal activity & thought process.'
